RESEARCH

Trinity College Summer Research Program *May 2018 — February 2019*

Simultaneous Conjugability of Non-Associative Algebras Constructed from Integers Modulo Powers of Two

- Built routines in Python using SageMath libraries in Jupyter notebooks to explore subgroups of the automorphism group of integers modulo 2^n for any n
- Generated a regular lattice presentation of subgroups of this form to illustrate subgroup containment
- Determined an algorithm to exhaustively specify these subgroups for any given n
- Developed an approach to test the simultaneous conjugability of certain non-associative algebras constructed algorithmically from the aforementioned subgroups
- Presented lecture with PowerPoint to research faculty and students regarding findings

PROFESSIONAL EXPERIENCE

Retail Sales Associate

May 2016 — June 2017

RadioShack

East Haven, CT
